Are there any features you would like to see implemented in the application?

yes, i would like to see a version of this application where i can instantly preview the recommended songs.

Did you encounter any issues of any kind throughout your experience using the application?

no, it was a very straight forward process

Please comment on if you consider the application useful.

i consider it very useful being a free tool which recommends songs and gets you out of your current listening habits. I would actually pay for this kind of software if it was available on the app store ..
